

Kshitij Lingthep (Chris L)

[662-638-9569](tel:662-638-9569) | Memphis, TN | kshitij.lingthep@gmail.com | [Linkedin](#) | [Github](#)

PROFESSIONAL SUMMARY

- **Full-Stack Software Engineer** with **6+ years** of experience designing, developing, testing, and deploying enterprise web applications using modern frameworks and scalable architectures.
- Proficient in **front-end technologies** including **ReactJS, VueJS, Redux, Context API, HTML5, CSS/SCSS, JS, Tailwind**, and **Bootstrap**, with strong expertise in **modular design, state management**, and **responsive UI** development.
- Extensive **back-end experience** with **Node.js, ASP.NET MVC, Spring Framework** (Spring MVC, Spring Data, Spring Boot, Microservices, JDBC, Spring REST, Spring Data JPA), **RESTful APIs, microservices**, and **database systems** (Oracle SQL, MySQL, PostgreSQL, MongoDB), including complex **queries, triggers, stored procedures**, and real-time updates with **SignalR**.
- Experienced in Agile development, **CI/CD pipelines, Git workflows**, and **mentoring junior engineers**, ensuring maintainable, scalable, and high-quality deliverables.
- Monitored and maintained applications using **Log4j** logging, **JIRA** for issue tracking, **Grafana** for resource monitoring, and Agile methodologies across the SDLC.

TECHNICAL SKILLS

- **Languages:** Java (8/11/17), JavaScript, C#
- **APIs:** JDBC, JPA, OpenAI, Perplexity
- **Design patterns:** MVC, DAO, DTO, N-tier, and Front Controller, Event Driven, Pub/Sub
- **Frameworks:** Spring, Spring Boot, Hibernate, Express, Microservices, Micro Frontend, .NET
- **Tools and Libraries:** ReactJS, VueJS, Node.js, Tailwind, SCSS, Bootstrap, ChartJS, Echarts, Redux, Vuex, NextJS, ThreeJS, TypeScript, Element UI, Entity Core, LINQ, Kafka, GraphQL, SignalR, Grafana, Github Copilot
- **Application Servers:** Apache Tomcat, Nginx, Node.js, IIS
- **IDE:** Eclipse 3.x, IntelliJ, Visual Studio Code, Rider, DataGrip, DBeaver
- **Build and Test Tools:** Maven, Gradle, JUnit, Mockito, Jest, Test Utils
- **Databases:** MySQL, PostgreSQL, MongoDB, Oracle, PL/SQL
- **Operating Systems:** Windows, MacOS, Linux
- **Source Control:** Git, Git Extensions, Source Tree
- **Cloud & DevOps:** AWS, Docker, Kubernetes, Terraform, Swagger, GitHub Actions, GitLab CI/CD
- **Project Management:** Grafana, GitLab, Confluence, Jira

CERTIFICATIONS

- **AWS Certified Solutions Architect** – AWS, Terraform – LinkedIn, Solutions Architect Knowledge Badge – AWS, Generative AI – Udemy, MERN Stack – LinkedIn, React – TestDome, Project Management – Microsoft

Software Engineer | SK Battery America | May 2024 - Present, Stanton, TN

- Designed and developed **modular**, responsive user interfaces using **React**, HTML5, SCSS/SASS, JavaScript, and **Bootstrap**, supporting real-time facility and manufacturing dashboards.
- Implemented **SignalR** based real-time communication, pushing live equipment data and alerts to dashboards, **reducing response time to production issues by 40%**.
- Led end-to-end **SDLC** for **Facility Monitoring System (FMS)** enterprise applications using **Java, ASP.NET MVC** and **Oracle**, delivering scalable production solutions for facility monitoring, achieving **99.9% system uptime**.
- Contributed to the design and delivery of a **Manufacturing Execution System (MES)** for module process in battery manufacturing, real-time tracking of production workflows, equipment status, and quality parameters, improving **operational visibility by 30%**.
- Built admin dashboards for device management and monitoring, integrating **Log4js** logging and downtime analytics to identify recurring equipment failures, **reducing unplanned production stoppages by 15–20%**.
- Optimized backend performance and deployment by developing **PL/SQL stored procedures**, tuning **Oracle queries**, and managing **IIS** based deployments, improving data processing and reporting.
- Strengthened code quality and team productivity by mentoring junior developers, enforcing Git best practices, and collaborating in Agile/Scrum teams to deliver features on schedule.

Software Engineer | Foxconn Industrial Internet | July 2020 - May 2024, Mount Pleasant, WI

- Participated in full **Software Development Life Cycle (SDLC)**, including requirements gathering, design, analysis, design, development, testing, and deployment.
- Developed and designed responsive, user centric **UI** using **HTML5, CSS3/SASS, JavaScript, JQuery, ReactJS/ VueJS, ContextAPI/ Redux/VueX, Node.js and Bootstrap**.
- Implemented state management and performance optimization strategies (**Context API, Redux, VueX, lazy loading, code splitting, memoization**), **reducing page load times by 30–40%** and **improving Lighthouse performance scores to 90+**.
- Implemented **internationalization/localization** for user interaction, expanding accessibility and user engagement.
- Innovated **custom npm packages** using **JavaScript, Node.js**, and published them to the internal npm registry, **reducing duplicated development by 20%**.
- Designed and implemented enterprise applications using **Hibernate framework, Spring IOC, Spring MVC, Spring Boot, Spring JDBC, Spring Annotations, Spring Integration, frameworks, RESTful web services**.
- Modernized legacy systems by implementing **microservices** architecture using **Spring Boot** and **.NET Core** (Entity Framework), improving deployment frequency and **reducing system downtime by 30%**.
- Utilized **OAuth 2.0** protocol to enable secure authentication and authorization for **RESTful APIs**.
- Developed data access layers using **Hibernate** and **Spring Data JPA**, optimizing database interactions and query performance.
- Developed **Jest, Test Utils, JUnit**, and **Mockito** test cases to unit test the business logic.
- Implemented **CI/CD** using **GitLab CI**, improving deployment automation and release consistency.
- Actively involved in transitioning from traditional data center models to cloud-based solutions using **AWS services**.
- Built event-driven microservices architecture using **Kafka's** pub-sub model.
- Set up **Google Analytics** to track and analyze website traffic, user behavior, and engagement metrics.

Full Stack Developer | Department of Mathematics | University of Mississippi | Jan 2020 - May 2020

- Developed an intuitive **React** based user interface for attendance tracking, leveraging **Context API** for state management and modern design principles, **improving task efficiency by 50%**.
- Implemented **real-time data synchronization** and storage using **Firebase Authentication** with role-based access control, supporting 50+ concurrent users and ensuring secure, instant access to attendance.
- Built a robust backend with **Node.js**, handling **data processing, business logic**, and **RESTful API** interactions with the frontend, **reducing server response times by 25%** and ensuring scalable performance.
- Conducted thorough testing and collaborated with cross-functional teams, **ensuring 99% feature reliability, cross-browser/device compatibility**, and seamless, high-quality user experience.

PROJECTS

Multi Agent Deal Discovery platform | Dec 2025 - Jan 2025

- Built an autonomous **multi-agent GenAI** system using **OpenAI** and **Perplexity** APIs, coordinating 7 specialized agents for deal **discovery, pricing, retrieval, prediction**, and **planning**.
- Developed production AI pipelines combining a fine-tuned LLM, RAG with **ChromaDB**, and a PyTorch model, delivered via a **Gradio UI** with structured outputs and real-time monitoring.

Find Price | Dec 2025 - Dec 2025

- Designed and delivered a GenAI system using **OpenAI** and **Perplexity** APIs, encompassing **data curation, preprocessing, prompt engineering, embeddings**, and **inference** to generate automated, cost-optimized product insights.
- Built **NLP pipelines** to extract and **semantically analyze** Amazon product descriptions, estimate prices, and recommend cheaper alternative products using embedding-based search and AI-driven reasoning.

Windows Portfolio | Jan 2023 - July 2023

- Developed a **Windows 11** themed [portfolio](#) website using **React** and **Tailwind**, with linting/code standards (ESLint/Prettier) and **CI/CD** via **GitHub Actions**.
- Implemented a dynamic [project gallery](#) with interactive modals and integrated **Google Analytics** to monitor user engagement and traffic.

EDUCATION | The University of Mississippi | Oxford, MS | Aug 2016 – May 2020

- **B.S. In Computer Science [Full ride Scholarship]** | Overall GPA: 3.71 | Honor's Roll | Provost Scholar
